

Due to the current situation and out of respect for everyone's time, we are cancelling the April 7th in-person Rural & Frontier Solutions Workgroup meeting. We are scheduling a virtual meeting on May 20th from 9am - 12pm MT/ 8am – 11am PT and will send an outlook invite following this email. We continue to work on this important project, including data analysis, cost driver diagram/logic model, and one-page brief as we discussed at the last meeting. We are also in the process of recruiting two new staff, as supported by the state legislature, for the Office of Health Policy Initiatives in the Bureau of Rural Health & Primary Care. These staff will support the Healthcare Transformation Council of Idaho and its workgroups.

We are very mindful of your current demands and will provide ample time for you to review and respond to any draft documents or materials. We want to support you as much as possible and will continue to work behind the scenes on this initiative while you are working to protect your communities.

Best regards,

Stephanie Sayegh
Health Program Manager (Idaho Flex and SHIP Coordinator)
